---

We need to touch very closely those matters of economic and social interest that affect the daily life of the population and precisely because milk production is an area of food security, the concern to solve the deficiencies that production units present today are directly addressed by the Popular Councils, Permanent Work Commissions of the Municipal Assembly of People's Power, Deputy to the Cuban Parliament, Party officials and the government leadership in the Pedro Betancourt territory.

In the Business Unit of Base The Test, belonging to the Livestock Genetic Company of Matanzas, the control and inspection of its dairy farms is carried out to check the status of compliance with the milk production plan, the assurance of the feeding of the livestock mass, the delivery of milk to the state and growth of births. There is also concern about the improvement of artificial insemination to guarantee the quality of reproduction, the protection of livestock and the growth of the production plan of all dairy farms.
