

Very early, when the morning fog persists, INDER workers and managers need to improve social work in these times of confrontation with COVID_19, fundamentally in the organization of queues, delivery of medicines and food to the most vulnerable of the population. Compliance with the guidelines of the Defense Zone is vital to maintain discipline and order in the current epidemiological situation of the country Today it is necessary to eradicate deficiencies in the purchase and delivery of medicines to people who live alone and do not have obligated relatives to solve these needs
