Analysis of the Program of 5 kgs of Animal Protein, which is part of the self-sufficiency program of the Municipality of Pedro Betancourt, this Municipal Self-sufficiency Program is implemented in the 5 Popular Councils of the Municipality of Pedro Betancourt, with its 27 settlements in the 41 districts .

The Marketing Network to ensure the 5 kgs of animal protein, is approved by the CAM, operates a collection and marketing network made

up of 10 points of sale and 2 state agricultural markets.

463 producers are incorporated into the program.

- A training and extension plan for the program is being carried out.
- It is necessary to dedicate to the program, to meet the main objectives, 189.19 hectares of land and 375.1 hectares of water bodies.

IT IS WORKING ON: improve the design, organization and control of the program at the level of popular councils, communities and reproductive units. the establishment of the strategy of each locality, taking into account current population, facilities, movement of herds by species, resources, and the existing food base. the diagnosis of the mass of animals by species, according to the composition and their holders. Monthly analysis of the breeding progression (goat, cunicula, swine) of the different species demanded by the territory.

Not all the objectives and goals have been met yet, since the pounds per capita achieved, both of agricultural and livestock products, are insufficient to make the Program grow, the municipality has two great strengths, which will allow facing future challenges: poultry genetics and water mirrors.
