Since February 17, the municipality of Pedro Betancourt has not reported new positive cases for COVID-19, the result of the great effort made by the authorities of the municipality in conjunction with public health workers. Preventive work has played a fundamental role (the investigation and timely isolation of suspects and their contacts). Thanks to all who have made it possible to obtain these results. Let's keep our guard up and complying with the established measures. The vaccine we have in our hands today is individual responsibility and self-care.
