

Intense days of work in the preparation of the conditions of clinics and vaccinations, characterized the weekend in the territory of Pedro Betancourt.

Public Health Workers together with neighbors and social factors of the community deployed all possible initiatives to beautify these places where the health intervention with the vaccine candidate ABDALA in the first group of 19 to 49 years will begin on May 19.

Cleaning the outdoor areas, placing the necessary furniture, checking the lighting and the water supply of each premises, were at the center of interest of the task.

The researchers, education, sports, culture, cederistas and federated personnel from each area stood out once again for their willingness and altruism in all missions to confront COVID-19.
